E-invoicing Error Codes

Error Code	Error Message	Reason for Error	Resolution
2140	Error while validating invoice	The request JSON payload is not as per the currently used eInvoice request schema	Please refer to the API developer portal for details https://einv-apisandbox.nic.in
2141	Error while cancelling invoice	Some unexpected error has occurred while cancelling the eInvoice	Please check the request payload and header and try again. If issue is unresolved, contact helpdesk with complete details of the request.
2142	Incomplete request parameters		
2143	Invoice does not belong to the user GSTIN	User is attempting to perform some operations on IRN which does not belong to the currently logged in user	Certain operations cannot be carried out on other's IRNs such as cancel etc
2146	Unable to create IRN, pls. try after some time	Due to some unexpected scenario, IRN could not be generated at the moment	Please try after some time. If issue persists, contact helpdesk with complete details of the issue
2147	Unable to sign invoice, Pl try after some time	Some unexpected error has occurred while signing the Invoice	Please try after some time. If issue persists, contact helpdesk with complete details of the issue
2148	Requested IRN data is not available	User is trying to do some operation on an	Please check whether IRN is correct or the operation is being carried out within

		IRN which is not available in the eInvoice system	permitted time duration.
2150	Duplicate IRN	Attempting to register a document again which is already registered and IRN is generated	Don't fire the same request simultaneously. This results in one request giving the error as 'Duplicate IRN request'. Best way to avoid firing of IRN request repeatedly for the same request, is update in your system with IRN number when the response comes back. Next time check the IRN, if it is not there, then fire for IRN.
2154	IRN details are not found	Attempting to register a document again which is already registered and IRN is generated.	Don't fire the same request simultaneously. This results in one request giving the error as 'Duplicate IRN request'. Best way to avoid firing of IRN request repeatedly for the same request, is update in your system with IRN number when the response comes back. Next time check the IRN, if it is not there, then fire for IRN.
2155	Supplier GSTIN is required	Request payload dos not have supplier GSTIN	Supplier GSTIN is mandatory
2156	Invalid format - from Date (The correct format is DD/MM/YYYY)	User is passing wrong date format for from Date	Date format should be in DD/MM/YYYY. Please refer to the request JSON schema
2157	Invalid format - to Date (The correct format is DD/MM/YYYY)	User is passing wrong date format for to Date	Date format should be in DD/MM/YYYY. Please refer to the request JSON schema
2159	Invalid value for reverse charge applicable field	Invalid value has been sent for the attribute to pass whether reverse	Please refer to the request JSON schema

		charge applicable	
2162	Reverse Charge is not applicable for this transaction	Trying to set 'Reverse Charges applicable' for transactions other than B2B transaction	Check the 'Reverse Charges Applicable' parameter as per the current type of transaction
2163	The document date should not be future date.	Attempting to set future date for the document date	Check the document date being passed
2169	Request for IRN is neither from supplier GSTIN or e-Commerce GSTIN	Logged in user GSTIN does not match with either the supplier GSTIN or eCommerce GSTIN	If a supplier is registering the Invoice, GSTIN passed in the request header should match with the supplier GSTIN. If an eCommerce operator is registering the Invoice, GSTIN in header should match with the eCommerce operator's GSTIN in the request payload
2172	For Intra-state transaction, IGST amount is not applicable; only CGST and SGST amounts are applicable	IGST amount is being passed for Intra State transaction where as CGST and SGST are applicable.	Please check the applicable taxes for current transaction. If the State code of Point of Supply (POS) of recipient is same is state code of Supplier, then CSGT and SGST applies. However, under exception circumstances as per rule if IGST is applicable for intrastate transaction, then pass the 'IGST_on_IntraState_Supply' flag as 'Y' with IGST value so that system can process your request.
2173	You have exceeded the limit of number of items	User has passed the requests payload with a greater number of li	Please check the number of line items being passed. Please refer to the specific API for large number of items. If limit for that API is also exceeded, contact helpdesk with invoice details
2174	For inter-state transaction, CGST	CGST and SGST taxes are being passed for	Please check the applicable taxes for current transaction. If the State code of

	and SGST amounts are not applicable; only IGST amount is applicable	interstate transactions	Point of Supply (POS) of recipient is different than the state code of Supplier, then IGST applies. Pl check the details.
2176	HSN code(s)- {0} is invalid	Wrong HSN code is being passed	Pl check the HSN code being passed and cross-check the correctness of HSN code on e-invoice portal. Still, if you feel it is correct, then please send the details to the helpdesk for verification at e-invoice system side.
2177	Unit Quantity Code(s)- {0} is/are not as per master	Invalid unit code has been passed	Please pass the correct unit code as per the master provided for e-invoice. Check the correct unit code in the portal under Search -> Master codes. If the unit code is not matching with your required unit, you may have to convert unit to one existing in the master list of unit code.
2182	Taxable value of all items is not equal to total taxable value	Sum of taxable amounts of all items should be equal to invoice level taxable amount.	Please check the request payload for the taxable value validation. Total Taxable Value = Taxable value of all line items
2183	SGST value of all items is not equal to total SGST Value	Sum of SGST amounts of all items should be equal to invoice level SGST amount	Please check the request payload for the SGST value validation.
2184	CGST value of all items must be equal to total CGST value	Sum of CGST amounts of all items should be equal to invoice level CGST amount	Please check the request payload for the CGST value validation.
2185	IGST value of all items must be equal to total IGST Value	Sum of IGST amounts of all items should be equal to invoice level	Please check the request payload for the IGST value validation.

		IGST amount	
2186	Cess value of all items must be equal to total Cess Value	Sum of Cess amounts of all items should be equal to invoice level Cess amount	Please check the request payload for the Cess value validation.
2187	State Cess Value of all items must be equal to total State Cess Value	Sum of State Cess amounts of all items should be equal to invoice level State Cess amount	Please check the request payload for the State Cess value validation.
2189	Total Invoice Value is not matching with calculated value	Invoice level total value has not been calculated as per the past values.	Invoice level total value is equal to totals of all the total item value plus other charges minus discount with tolerance limit of +/- One. Pl refer to the validations in sandbox portal.
2192	TotAmt value should be equal to (Qty * Unit Price) for HSN {0}	Total amount for the specified item is incorrect	Item level total amount should be the product of quantity and unit price
2193	For Sl. No. {0}, Taxable Value (AssAmt) value is not equal to (TotAmt - Discount)	Incorrect assessable amount is passed for the specified item.	For the specific item, assessable amount should be arrived at by deducting discount from total amount
2194	For Sl. No {0}, Total item value does not match with taxable and tax values of that item	Total item value passed is incorrect.	Total item value should be sum of assessable value, all tax and cess values, other charges with tolerance limit of +/- One. Please refer to the validations in the portal.
