OVERVIEW

Executive Summary

> *"India has 63 million small businesses. 95% still manage accounts in notebooks or basic Excel. Vyapar and Tally serve a tiny fraction. Invio is built for the rest — with AI that speaks their language."*

What Invio Is

- **AI-powered business management platform**
  Invoicing · Inventory · GST · Accounting · Insights
- **Voice-first data entry in Hindi, Marathi, English**
  10 voice parsing endpoints — just speak your invoice
- **Cross-platform: Web, iOS, Android, Desktop**
  One codebase, four native platforms via Next.js + Electron + Capacitor
- **12 specialized AI engines**
  From invoice parsing to GST insights to payment reminders
- **SaaS subscription model**
  Free tier → Pro ₹499/mo → Business ₹999/mo

The Problem We Solve

⛔ Pain Point 1

Invoicing is manual & slow
Average SME spends 3–4 hours/week on invoicing and tax compliance manually

⛔ Pain Point 2

GST compliance is terrifying
63% of SME owners fear GST notices. GSTR filing mistakes cost ₹5,000–₹50,000 in penalties

⛔ Pain Point 3

Existing tools ignore AI & voice
Vyapar, Tally, Zoho — none offer voice entry, AI insights, or Hindi-first UX

Technology Moat

🧠 AI Stack

Groq (Llama 3.3 70B) for inference — 10× cheaper than GPT-4 with equivalent accuracy for Indian accounting domain. Whisper for voice transcription.

🔊 Voice-First Architecture

10 specialized parsing endpoints, each trained with Indian SME vocabulary. Hardware traders tested in Nagpur with 94% accuracy on item names.

⚡ Real-Time Foundation

Supabase Postgres + Realtime subscriptions. Multi-user without polling. RLS ensures data isolation by business at DB level.

📱 Universal Platform

Next.js 16 + React 19 → Web. Electron → Desktop. Capacitor → iOS + Android. Single codebase, four native apps. No code duplication.

The Network Effect Plan

Every invoice sent via WhatsApp carries an **"Invio se bana"** footer link.
Every CA who files GSTR via Invio brings 5+ clients.
Every business sharing an invoice exposes Invio to a new customer.
Viral loop → Lower CAC → Higher margins over time.

Why Invio Wins

MOAT 1
Zero AI competition in Indian SME accounting. First-mover with voice + AI = 18-month head start.

MOAT 2
Industry-specific vocabulary learning — the longer a business uses Invio, the harder it is to switch.

MOAT 3
Invoice data is the richest financial dataset for SME lending. Future embedded finance flywheel.

The next Vyapar is being built with AI. And it speaks your language.

India's 63 million small businesses deserve an accountant that never sleeps, speaks Hinglish, and fits in their pocket for ₹499/month.
